

DYNANAIL HELIX™

A new twist on the nail:
revolutionizing dynamic
compression with disruptive
NiTiNOL technology

ACTIVE, ADAPTIVE HEALING FOR FOOT & ANKLE FUSION

NAIL SYSTEM

FEATURES & BENEFITS:

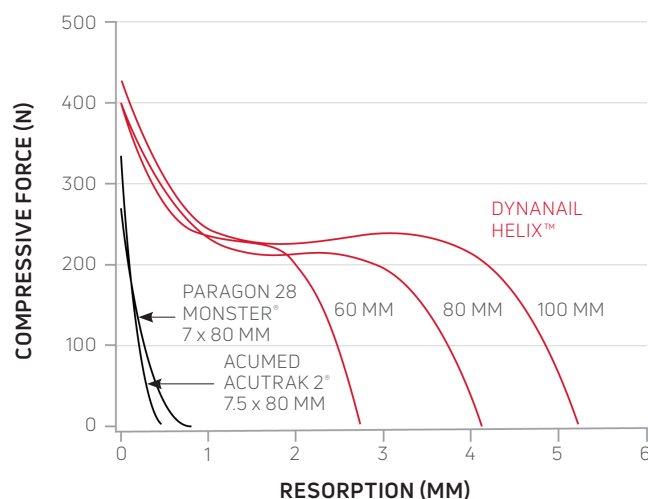

- Internal NiTiNOL element offers between 1 - 5 mm of active compression in response to bone settling or resorption.
- Available in headed and headless options for procedural and anatomical versatility. Sizes range from 50-100 mm in 5 mm increments.
- Threads allow for easy insertion, similar to a screw.
- NiTiNOL Compressive Element comes pre-stretched and pre-loaded on a disposable Nail Guide for enhanced efficiency.

SUSTAINED DYNAMIC COMPRESSION

Next generation technology encourages active, adaptive healing through sustained dynamic compression.

Compared to traditional static screws, DynaNail Helix provides significantly more compression in response to bone settling or resorption.¹

Data represents loss of compression as function of increased bone resorption in synthetic bone. Laboratory testing does not necessarily indicate clinical performance.
