

ENOFIX™

WITH
CONSTRUCTOR®
TECHNOLOGY

The dynamic duo with Arsenal Ankle Plating System™. Knotless syndesmotic repair that demonstrates superior fixation under cyclic loading.¹

SOFT TISSUE REPAIR SYSTEM

Enofix™ with Constrictor® Technology is indicated for the treatment of disruptions to the ankle syndesmosis ligament complex.

The technology provides surgeons the ability to treat syndesmotic injuries using a knotless adjustable button system comprising of UHMWPE suture and low profile titanium button.

BENEFITS

- Superior fixation under cyclic loading¹
- Physiologic stabilization of the ankle mortise

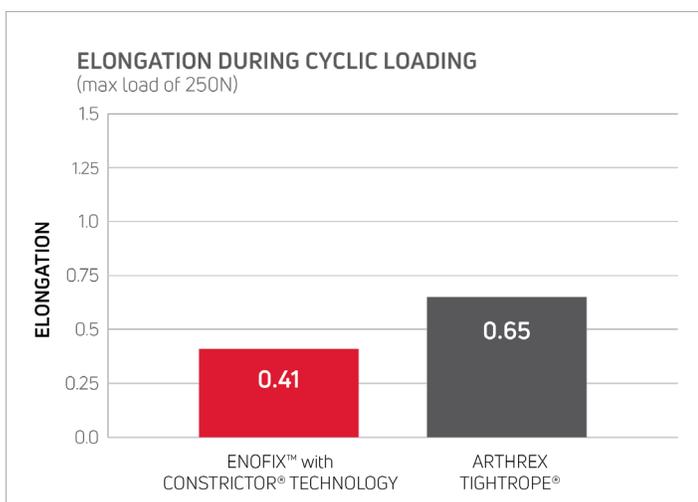

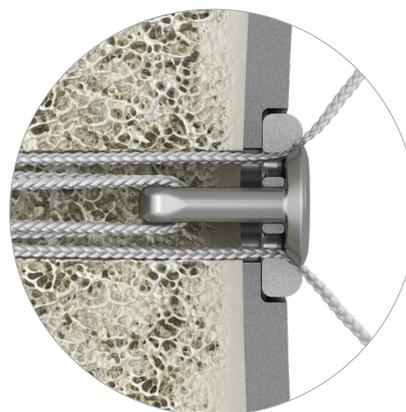

DESIGN FEATURES

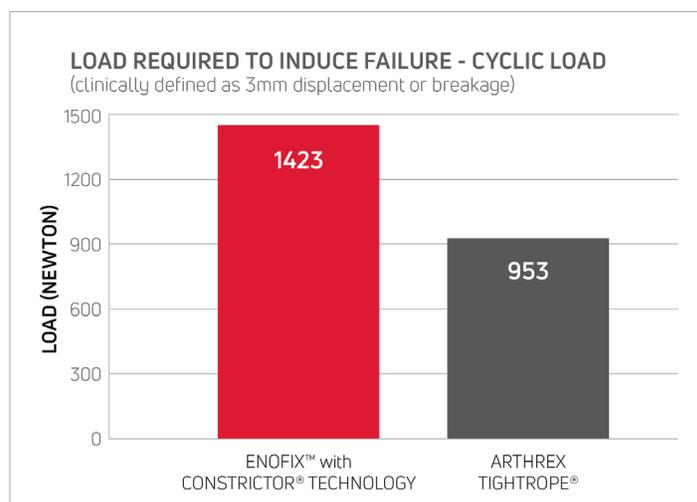

- Knotless adjustable fixation system
- Patented self-locking design to assist with ligament repair

ADJUNCT TO FRACTURE REPAIR

- Designed to reduce the risk of rigid malreduction across ankle syndesmosis
- Button compatible with multiple plating systems
- Designed to reduce rate of re-operations

Average maximum elongation during cyclic loading

Superior ultimate failure-to-load as compared to the market leader
